Re: New Hampshire's 1332 Waiver Application

Dear Secretary Azar and Secretary Mnuchin:

Thank you for the opportunity to submit comments on New Hampshire's Section 1332 waiver application.

The undersigned organizations represent millions of individuals facing serious, acute and chronic health conditions across the country. Our organizations have a unique perspective on what patients need to prevent disease, cure illness and manage chronic health conditions. The diversity of our groups and the patients and consumers we represent enables us to draw upon a wealth of knowledge and expertise and serve as an invaluable resource regarding any decisions affecting state health insurance marketplaces and the patients that they serve. We urge the Departments to make the best use of the recommendations, knowledge and experience our organizations offer here.

Our organizations are committed to ensuring that any changes to the healthcare system achieve coverage that is adequate, affordable and accessible for patients. A strong, robust marketplace is essential for people with serious, acute and chronic health conditions to access comprehensive coverage

that includes all of the treatments and services that they need to stay healthy at an affordable cost. Our organizations support New Hampshire's efforts to strengthen its marketplace by submitting this application to implement a reinsurance program, and we urge the Departments to approve the application.

Reinsurance is an important tool to help stabilize health insurance markets. Reinsurance programs help insurance companies cover the claims of very high cost enrollees, which in turn keeps premiums affordable for other individuals buying insurance on the individual market. Reinsurance programs have been used to stabilize premiums in a number of healthcare programs, such as Medicare Part D. A temporary reinsurance fund for the individual market was also established under the Affordable Care Act and reduced premiums by an estimated 10 to 14 percent in its first year.<sup>1</sup> A recent analysis by Avalere of seven states that have already created their own reinsurance programs through Section 1332 waivers found that these states reduced individual market premiums by an average of 19.9 percent in their first year.<sup>2</sup>

Stabilizing health insurance marketplaces is particularly important given the outbreak of COVID-19. Uncertainty around the number and severity of cases in the coming months will make it harder for insurers to project their costs, and insurers may set higher rates for premiums in 2021. By establishing a reinsurance program, New Hampshire may help offset any premium increases in 2021, making health insurance more affordable and accessible for New Hampshire residents.

New Hampshire's proposal will create a reinsurance program starting for the 2021 plan year and would last for five years. Based on the initial analysis commissioned by the state, this program is projected to reduce premiums by approximately 16 percent in 2021 and increase the number of individuals obtaining health insurance through the individual market by 6 percent. This would help patients with serious, chronic and acute health conditions obtain affordable, comprehensive coverage.

Our organizations believe this 1332 Waiver will help stabilize the individual market in New Hampshire and protect patients and consumers. Thank you for the opportunity to provide comments.

Sincerely,

American Heart Association  
American Lung Association  
Arthritis Foundation  
Cystic Fibrosis Foundation  
Hemophilia Federation of America  
Leukemia & Lymphoma Society  
March of Dimes  
National Multiple Sclerosis Society  
National Organization for Rare Disorders  
National Psoriasis Foundation
